

RRW-series Air Ratchet Wrenches

NEW!

Red Rooster Professional Airtools

The new Red Rooster air ratchet wrenches are suitable for use in workshops and are being applied for loosening and tightening threaded bolts in confined spaces. Using these air ratchet wrenches will save you time and the skin on your fingers.

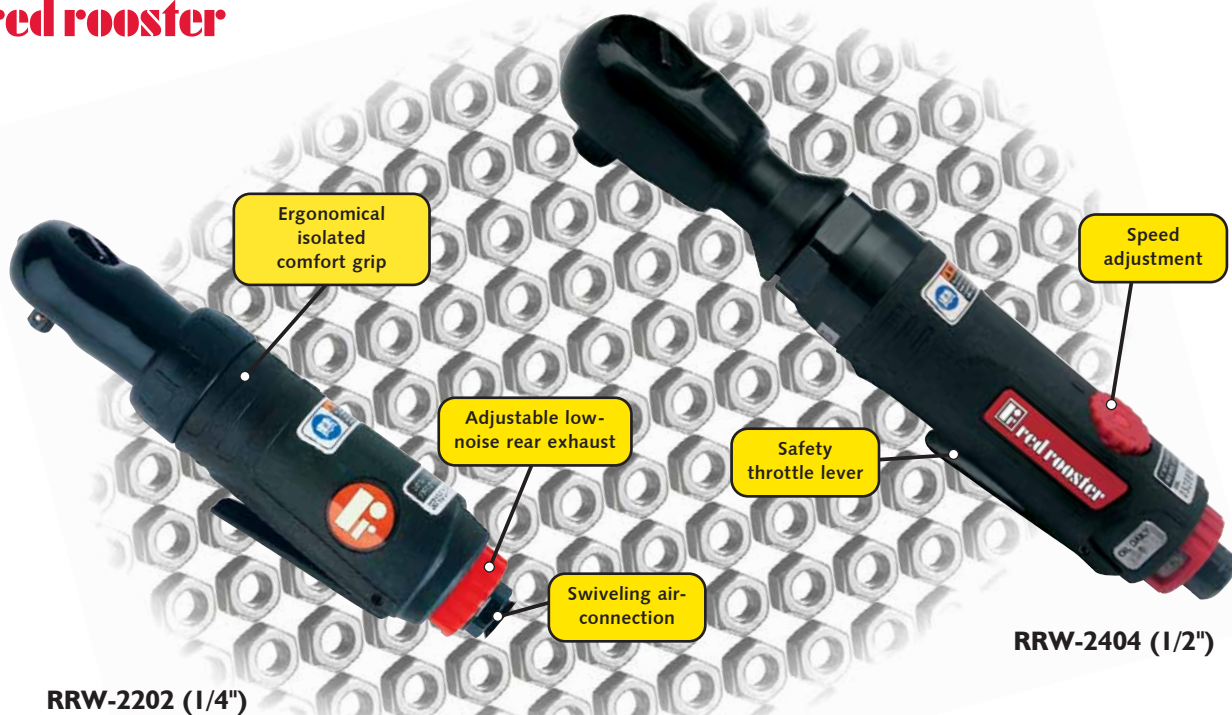

Ratchet Wrench with comfort grip

The new ergonomical and silent Ratchet Wrenches

The RRW-series Air Ratchet Wrenches in detail

The development of these ratchet wrenches is based on user-friendliness. The rubber cover of the motorcase offers good isolation against the cold. The rear exhaust is silenced and can be rotated in order to direct the exhaust air away from the user. The ergonomic handgrip offers a firm hold on the tool and the speed-adjustment button is practical when the thread is damaged.

RRW-2202 (1/4")

RRW-2404 (1/2")

Technical specifications

Type	Square-drive	Boltcapacity mm	Rotations p/min	Torque Nm	Noise-level dB(A)	Air-consumption l/sec	Air-inlet mm	Length mm	Weight kg
