

NEEDLE SCALERS

RRI-4006VL & RRI-4007VL

NEW!

Features:

- Red Rooster has increased the range of needle-scalers with the RRI-4006VL. The design of the tool made it possible to realize a vibration level of only 2,7 m/s² under full load.
- The needle scalers can be used to remove rust, old paint-layers or mortar and concrete from surfaces. Also the removal of welding flux from the welding seam is made easy by using the appropriate needle scaler. The geometry of the needle-sets allow the tool to be handled in corners and uneven surfaces.

**Choose the needle scaler
with the lowest vibration level,
choose Red Rooster.**

Type	Brand	Bore diameter mm	Stroke mm	Needles 3 mm ²⁾	Blows p/min	Air cons. l/s	Weight kg	Inlet-thread	Hose diameter mm	Vibration m/s ²	Noise level dB(A)
