RRI-GT50F High performance angle turbo grinder

Double Power with low weight!

The RRI-GT50F is an reliable, easy to handle, light-weight angle grinder with high power. This grinder uses a turbine air motor instead of the conventional vane motor. Therefore necessary for optimal performance is high quality clean air, with sufficient flow. (Preferable 3° Celsius dewpoint). See SMC IDFA airdryers.

Technical specifications RRI-GT50F

- Perfect weight/power ratio.
- Exhaust can be directed to the choice of the user.
- Spindle with double bearing. This ensures less play thus less wear and tear. This results in longer life.
- Speed regulator is mounted separately which makes the grinder much more robust.
- Easy adjustable side handle for Left- or Right-handed use.
- Slim design, compact angle head for access to confined areas.
- Spindle offset only 22,5 mm.
- The protective cover can be easily adjusted.
- Changing of discs is made easy and very fast by means of the Spindle-lock.
- Supply includes a mounted hose, including a 5µ filterelement.

Power: 2.2 kW
Speed: 12200 RPM
For wheelsize
Ø: 125mm
